Case No.: 59489US002

REMARKS

Reconsideration is requested.

Claim Status

Claims 1-19 are pending. No claims are amended, canceled, or added in this paper.

Double Patenting Rejection

A terminal disclaimer over U.S. Patent No. 7,041,727 is submitted with this paper. This disclaimer is submitted merely to expedite prosecution and without prejudice to Applicant's arguments that claims 1-19 are patentability distinct over the cited patent.

In view of this disclaimer, Applicants respectfully submit that the rejection for obviousness-type double patenting is overcome and should be withdrawn.

Request for Entry of Amendment to Specification

The specification is amended at page 16 (paragraph 0087 of U.S. Patent Application Publication No. 2005/0145134 A1) to replace "less" with "equal to or greater" correcting an inadvertent error. Antecedent basis is found elsewhere in the application, e.g., page 2, lines 25-26 (i.e., paragraph 11 of the published version). Entry of this amendment after final rejection is requested. The amendment does not change the scope of the application or raise any new issues. The inadvertent error was discovered in the course of reviewing the application in connection with the outstanding Office Action.
